Tomorrow's Threats Require a New Enterprise Security Paradigm

24/7

Monitoring and Remediation

What is the value of team of experts monitoring your endpoints around the clock? Once a credible threat is identified, the malicious activity is immediately stopped in its tracks and our team ensures remediation.

REAL TIME

Endpoint Protection

Multiple patented AI algorithms protect against the widest array of threat vectors. Eliminate dependency on connectivity, cloud latency, and human intervention. On-device AI prevents known and unknown threats in real time.

ACTIVE
